Title: TCS RoHS and REACH			
Policy Number TCS_QP008	**Rev: 1**	**Date: 31/01/2023**	**Author: M.Sloan**

The Regulation on the registration, evaluation, authorisation and restriction of chemicals (REACH) is the main EU law to protect human health and the environment from the risks that can be posed by chemicals. This is done by better and earlier identification of the intrinsic properties of chemical substances and by taking measures, such as phasing out or restricting substances of very high concern (SVHC).

The REACH regulations (EC1907/2006) entered into force in 2007 and has since evolved to reflect the advancement of knowledge regarding various chemicals and their properties.

REACH places responsibility on industry to manage the risks from chemicals and to provide safety information on the substances. As a processor of raw and semi-finished materials, TCS recognises the implications of REACH regulations as applied to our business and to the best of our knowledge, products manufactured by TCS along with any finishing processes are compliant with current UK/EU RoSH & REACH legislation

Any materials that contain or use substances of very high concern (SVHCs), will be reported to the customer along with the relevant UK/EU datasheet (MSDS) All materials are purchased through registered UK/EU supply chains – we do not conduct any testing to verify SVHS's.

Signed

Michael Sloan; Managing Director
